

Stage 10, 11 & 12 Online Theory

Overview:

The new online Water Safety Knowledge components for stages 10, 11 & 12 are here!

Working with the great ideas from the Endorsed Swim School Committee review Royal Life Saving WA have developed online theory components for the Water Safety Knowledge strand of stage 10, 11 & 12. These will enable students to complete the theory components of their Swim & Survive stages outside of lesson time and provide more time for practical skill to be taught.

Each theory component will sit on the relevant level page on the Royal Life Saving WA website, and the links for these are below. We have also included the link for the Swim & Survive online learning home page, this includes all the online components currently available should you wish to send one generic email to all students.

It is recommended that these links get emailed to parents when their child enrolls into stage 10, 11 or 12. Alternatively you could provide the links via hardcopy when they enrol their child.

All online theory components cover the theory topics relevant to that stages Water Safety Knowledge requirements and is in line with the updated curriculum rolled out in 2017 as part of the Endorsed Swim School Committee review.

To complete the online Water Safety Knowledge students will need to click on the link for their stage, register for a My Royal account (or sign in if they have one) and then complete the course from their dashboard. Once they have successfully completed the course students will be able to download their certificate for the water safety knowledge strand. This can then be shown/given to their instructor or kept for their own records.

For any further information about this please contact Amy Vearing on avearing@royallifesavingwa.com.au or 9383 8200.
